SUBJECT INDEX OF VOLUME 74*

Boundary element methods

A boundary element approach for recovery of shape sensitivities in three-dimensional elastic solids, M.R. Barone and R.J. Yang (1) 69–82
Free and forced vibrations of plates by boundary elements, C.P. Providakis and D.E. Beskos (3) 231–250

Control theory

Synthesis of dynamical equations of mechanisms from their related control laws, M. Cotsaftis and C. Vibet (1) 29–40

Dynamics

Synthesis of dynamical equations of mechanisms from their related control laws, M. Cotsaftis and C. Vibet (1) 29–40
Free and forced vibrations of plates by boundary elements, C.P. Providakis and D.E. Beskos (3) 231–250
A recursive formulation for flexible multibody dynamics, Part II: Closed loop systems, S.-S. Kim and E.J. Haug (3) 251–269

Elasticity

A boundary element approach for recovery of shape sensitivities in three-dimensional elastic solids, M.R. Barone and R.J. Yang (1) 69–82
Hybrid finite element techniques for oil recovery simulation, R. Eymard, T. Gallouët and P. Joly (1) 83–98
Numerical study of a junction between a three-dimensional elastic structure and a plate, M. Aufranc (2) 207–222

Finite element and matrix methods

The *h-p* version of the finite element method for problems with nonhomogeneous essential boundary condition, I. Babuška and B.Q. Guo (1) 1–28
The Galerkin gradient least-squares method, L.P. Franca and E.G. Dutra do Carmo (1) 41–54

* The issue number is given in front of the page numbers.

A class of simple and efficient degenerated shell elements – Analysis of global spurious-mode filtering, L. Vu-Quoc and J.A. Mora (2) 117 – 175
Complementary mixed finite element formulations for elastoplasticity, J.C. Simo, J.G. Kennedy and R.L. Taylor (2) 177 – 206
An analysis of some element-by-element techniques, A.J. Wathen (3) 271 – 287
Modern homotopy methods in optimization, L.T. Watson and R.T. Haftka (3) 289 – 305

Matrix calculus

An analysis of some element-by-element techniques, A.J. Wathen (3) 271 – 287

Miscellaneous topics

The *h-p* version of the finite element method for problems with nonhomogeneous essential boundary condition, I. Babuška and B.Q. Guo (1) 1 – 28

Nonlinear mechanics

Synthesis of dynamical equations of mechanisms from their related control laws, M. Cotsaftis and C. Vibet (1) 29 – 40

Numerical solution procedures

Numerical solutions for oscillatory aerofoil at high reduced frequency, D.R. Chen and M.J. Sheu (1) 55 – 68
A numerical method for solving interface problems arising in two-point boundary value problems, M.T. Chu and G.H. Guirguis (1) 99 – 113
A recursive formulation for flexible multibody dynamics, Part II: Closed loop systems, S.-S. Kim and E.J. Haug (3) 251 – 269
An analysis of some element-by-element techniques, A.J. Wathen (3) 271 – 287

Optimization

Modern homotopy methods in optimization, L.T. Watson and R.T. Haftka (3) 289 – 305

Plasticity

Complementary mixed finite element formulations for elastoplasticity, J.C. Simo, J.G. Kennedy and R.L. Taylor (2) 177 – 206

Shells and plates

Hybrid finite element techniques for oil recovery simulation, R. Eymard, T. Gallouët and P. Joly (1) 83 – 98
A class of simple and efficient degenerated shell elements – Analysis of global spurious-mode filtering, L. Vu-Quoc and J.A. Mora (2) 117 – 175

Numerical study of a junction between a three-dimensional elastic structure and a plate, M. Aufranc (2) 207 – 222
Free and forced vibrations of plates by boundary elements, C.P. Providakis and D.E. Beskos (3) 231 – 250
Numerical analysis of junctions between plates, M. Bernadou, S. Fayolle and F. Léné (3) 307 – 326

Solutions of integral equations (singularity method)

Numerical solutions for oscillatory aerofoil at high reduced frequency, D.R. Chen and M.J. Sheu (1) 55 – 68

Solutions of ordinary and partial differential equations

The Galerkin gradient least-squares method, L.P. Franca and E.G. Dutra do Carmo (1) 41 – 54
A numerical method for solving interface problems arising in two-point boundary value problems, M.T. Chu and G.H. Guirguis (1) 99 – 113

Structural mechanics

Hybrid finite element techniques for oil recovery simulation, R. Eymard, T. Gallouët and P. Joly (1) 83 – 98
Numerical study of a junction between a three-dimensional elastic structure and a plate, M. Aufranc (2) 207 – 222
Numerical analysis of junctions between plates, M. Bernadou, S. Fayolle and F. Léné (3) 307 – 326

Systems of linear and nonlinear simultaneous equations

A recursive formulation for flexible multibody dynamics, Part II: Closed loop systems, S.-S. Kim and E.J. Haug (3) 251 – 269
Modern homotopy methods in optimization, L.T. Watson and R.T. Haftka (3) 289 – 305
